## Nominee's Statement

It is my pleasure to be running for the CCCF Board for my 3rd consecutive term. The motivation for my initial nomination in 2014 still applies as I feel advocacy in Early Childhood is never complete and needs consistent advocates to ensure progressive movement. I continue to value the essential work that ECE's do with children and families within each province, ultimately encouraging and supporting a Canadian wide system. Leveraging my current and previous experience within the profession, I demonstrate knowledge in each of the sectors (school age, family day homes, daycare) within Alberta. I lead in the middle to ensure I remain connected to the frontline as well as my involvement in many local committees and associations drive my support of the profession as a whole as nationally we embark on a new direction for sustaining an essential profession.

CCCF offers a lot to early childhood practitioners, families, and children across Canada. CCCF is that connection for people, across Canada, to receive the support required to successfully obtain a consistent message and understanding about child care. It is important to observe nationally what is occurring so each province can learn and move forward in unity. CCCF is that consistent movement and I want to be a part of it. Who more should we advocate for then the vulnerable sector, our future.
